JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

No quarantinable diseases were reported in the city and port during the month.

There were no transactions for the Canal Zone, nor for the Republic of Panama, during the month of March, 1907.

Report from Habana—Yellow fever case originating at Nueva Paz—Measures of disinfection and mosquito destruction.

Passed Assistant Surgeon Stansfield reports, April 5: One case yellow fever in Las Animas Hospital. Diagnosis confirmed by official yellow fever board this date. Case is Spaniard arrived Habana December 8, 1906. Resided Nueva Paz since about December 18. Contracted disease on plantation near Nueva Paz. Taken sick March 31. Sent to Las Animas Hospital April 4. Request instructions as to whether I shall impose quarantine.

This case was also reported by Major Kean, adviser to the sanitary department, as follows:

April 5. Case of yellow fever diagnosed to-day; occurred at Nueva Paz, southeast corner Habana Province. Has not left that district since arrival from Spain December 13. No reason to fear infection in Habana.

The following was sent to Doctor Stansfield:

April 6. Report to Bureau if any precautions in way of destroying mosquitoes, etc., have been taken at plantation near Nueva Paz, whence yellow fever came. No special order as to quarantine at present.

April 7. Reply to above: Disinfecting and oiling brigade of 40 men under experienced head have been sent to Nueva Paz from Habana to exterminate mosquitoes. Work will extend to all suspected places in vicinity.

NOTE.—Nueva Paz is about 45 miles distant from Havana. It has about 2,000 inhabitants.

Report from Santiago—Inspection of vessels.

Temporary Acting Assistant Surgeon Infante reports, March 27, as follows:

Week ended March 23, 1907. Bills of health issued to 5 vessels bound for the United States. No vessel was fumigated. No quarantinable disease has been reported.

ECUADOR.

Report from Guayaquil—Smallpox and yellow fever—Sanitary measures adopted at infected localities on Guayaquil and Quito Railroad.

Passed Assistant Surgeon Lloyd reports, March 12, as follows:

During the period from February 16 to 28, inclusive, there were 13 deaths from yellow fever and 5 from smallpox in Guayaquil. Seven vessels were fumigated during the month, 12 immune certificates issued, and 6 persons vaccinated.

Four cases of yellow fever have developed to date, including those previously reported, along the route of the Guayaquil and Quito
